NOTE

Academy Geomatics Ltd are not responsible for any situation, incident or loss resulting from actions or planning resulting from total reliance upon this drawing or accompanying information. No liability of any kind is accepted by Academy Geomatics Ltd for any omissions or inaccuracies in respect of this plan. The completeness of the underground utility network information cannot be wholly guaranteed and as such no guarantee or warranties are provided or implied. The location and/or identification of a utility will not positively indicate whether it is live or dead. A utility indicated from records that has not been located or identified on site does not imply that it does not exist or is dead. However, its presence should be anticipated. This plan must not solely be relied upon in the event of excavations or works in the area. The results of DMS and GPR detection techniques are not infallible and ground probing for the actual position and depth of services should be established.
